

# Making a pompom

## USE YOUR POMPOM MAKERS TO MAKE FLUFFY POMPOMS

- 1 Open the pompom maker rings and place them together – matching bumps to holes.
- 2 Wrap yarn round one half of the pompom maker until the centre is filled. You can use more than one strand at a time to speed up the process.
- 3 Repeat with the second half of the pompom maker.
- 4 Close the two halves together and lock them in place.
- 5 Insert a scissor blade between the rings and cut through the yarn all the way round.
- 6 Slip a long length of yarn between the rings and tie tightly. Do not cut the yarn ends, but use to attach the pompom to the wreath.
- 7 Remove the pompom maker. Trim the ends of the pompom, if necessary, leaving the long yarn ends to secure to your wreath.
